Summer-Lee Schoenfeld

Product Designer and Product Manager at Axiom Zen
Greater Vancouver Metropolitan Area

Summary

Senior product designer with 6+ years turning ambiguous problems into shippable products. Most notably, I led the pricing redesign for Toby, taking it from free to paid, driving 10x+ growth in paid adoption and ~12x revenue growth in a year. I balance design intuition with data and work closely with product and engineering from concept to launch.

Experience

Axiom Zen
6 years 5 months

Senior Product Designer and Product Manager
November 2023 - Present (2 years 10 months)

Hybrid role spanning product strategy, monetization, and design execution across shipped and unreleased initiatives. Partner closely with engineering and leadership to define direction, explore new product opportunities through design-led discovery, and guide products from concept through launch.

Key Contributions

- Contributed to early-stage product discovery and validation for unreleased initiatives through design exploration, shaping positioning, value propositions, and viability prior to public launch.

- Led pricing strategy and monetization design for Toby, transitioning the product from free to paid and driving 10×+ growth in paid adoption and ~12× revenue growth within the first year, while maintaining low, stable churn.

- Designed a pricing system grounded in real usage behaviour, including plan structure, usage limits, and upgrade mechanics aligned to product value rather than feature restriction.

- Defined a free-plan limit that surfaced a clear upgrade decision for power users while preserving value for the majority.

- Ran pricing research, surveys, and user interviews to understand willingness to pay, price sensitivity, and perceived value across key user segments.

- Owned prioritization and cross-functional alignment for monetization, onboarding, and account flows, using experimentation and analytics to inform decisions under tight timelines and platform constraints.

- Oversaw and mentored a design intern, balancing skill development with delivery by scoping work, setting priorities, and providing ongoing feedback.

Product Designer

April 2020 - November 2023 (3 years 8 months)

Vancouver, BC

Led product design across core Toby experiences, focusing on clarity, structure, and usability for a Chrome extension trusted by 400,000+ users.

Key Contributions

- Led design for major product surfaces including navigation, onboarding, mobile, and advanced organization workflows.

- Designed AI-powered features such as intelligent naming, sorting, and tab grouping to streamline workflows and reduce cognitive load.

- Owned end-to-end design execution from early exploration through launch, collaborating closely with engineering to ensure high-quality delivery.

- Ran user research, usability testing, and experiments to validate concepts and improve activation, retention, and overall experience quality.

- Partnered with customer support to identify recurring pain points and inform product improvements.

- Supported go-to-market efforts through feature messaging, in-product education, and rollout coordination.

Zenhub

Product Designer
2023 - 2023 (less than a year)

Contracted through Axiom Zen to support feature design, research, and product improvements across the ZenHub platform.

Key Contributions

• Designed “Saved Views,” enabling users to save and quickly return to preferred board configurations, reducing friction and improving workflow efficiency.

• Created a commenting system for Issues and Epics, strengthening communication and collaboration across teams.

• Designed the first version of an AI-driven Sprint Review feature to automate summary creation and support more efficient Agile practices.

• Developed research plans focused on optimizing ZenHub for managerial use, including initiatives aimed at improving clarity, satisfaction, and reducing manager churn.

Dapper Labs
1 year 4 months

Product Designer and Researcher
September 2019 - April 2020 (8 months)
Vancouver, Canada Area

Key Contributions

• Led user research for NBA Top Shot, conducting interviews and usability studies that informed product concepts, onboarding, and overall strategy in an emerging crypto collectibles space.

• Developed personas and synthesized research insights that shaped feature direction for Top Shot and early wallet-related experiences.

• Designed and contributed to initial MVP features, including catalog interactions and collection discovery tools.

• Supported cross-functional design efforts, including marketing assets, product UI flows, and creative direction for early product experiences.

Product Designer Intern
January 2019 - September 2019 (9 months)
Vancouver, Canada Area

Key Contributions

• Conducted foundational user interviews and early research for Dapper Extension and CryptoKitties to ensure alignment with user needs.

• Created personas for Dapper Wallet and CryptoKitties when user data was sparse, providing critical direction for product teams.

• Designed onboarding and recovery flows (e.g., “Shinies” onboarding, recovery kit flow) that improved user trust, account security, and overall engagement.

Simon Fraser University
Touchpoint Event Coordinator
February 2017 - February 2018 (1 year 1 month)
Vancouver, Canada Area

I managed and coordinated a two day design conference connecting SIAT design students with industry professionals. The conference consists of one day dedicated to design talks, presented by industry representatives, followed by a day of one-on-one interviews with design agencies. I aided with the planning and execution of the conference such as managing deadlines, balancing logistics, marketing, and communicating directly with industry personnel.

Tealeaves
Lead In-House Photographer
July 2016 - September 2017 (1 year 3 months)
Vancouver, Canada Area

Within a studio setting, I produced high quality photos that matched the company’s luxury brand and creative direction. I managed all facets of photo shoots including scheduling, art direction, designing sets, shooting, photo editing, delivering web page/newsletter assets, and collaborating with the creative team.

Pacific National Exhibition (PNE)
Lottery Clerk
June 2015 - September 2016 (1 year 4 months)
Vancouver, Canada Area

I was responsible for accurate verification and accounting of daily transactions over the phone, through the PNE online system, or mail. At the end of each shift I would accurately reconcile and account for the sale of tickets and cash. Summer contract

Golden Spike Days
Freelance Graphic Designer
July 2016 - July 2016 (1 month)
Port Moody, BC

Implemented a modern visual theme and produced various promotional newspaper advertisements for the 40th Annual Golden Spike Days Festival.

Simon Fraser University
Photography Teaching Assistant
January 2016 - April 2016 (4 months)
Surrey, BC

I assisted with teaching Introduction to Digital Photography, IAT 244. Throughout the term, I was responsible for facilitating workshops covering topics such as: elements of composition in photography, SLR camera basics, utilizing lighting kits, and photoshop editing tutorials. Further, I evaluated project submissions and provided constructive feedback on project submissions.

The Artona Group Inc.
In-Studio Photographer
August 2015 - January 2016 (6 months)
Vancouver, Canada Area

I was responsible for strategically posing students for their graduation portraits while ensuring high-quality photographs within a strict time limit. At the start of each shift, I was in-charge of setting up the camera, lighting, and computer settings to maintain consistency throughout all photographs.

Family Services of Greater Vancouver
Reception & Clerical Support
June 2013 - December 2015 (2 years 7 months)
Vancouver, Canada Area

I managed switchboard duties on a multi-line phone system, organized office meeting rooms, processed incoming and outgoing mail, and warmly welcomed clients into the agency. On multiple occasions I was incharge of manually inputting survey data into the online system for future annual reports.

Teacher Regulation Branch
Clerical Assistant
June 2014 - August 2014 (3 months)
